## SUSTAINABILITY

Indoor Air Quality FloorScore® Certified

Made in the USA

NOTE: For areas with lengths and/or widths longer than 20' the perimeter of the room requires a minimum of a 4" strip of PSA on the perimeter of the subfloor and at 20' distance parallel to the perimeter forming a grid. For commercial traffic or rolling load areas we recommend Signature 3000 (PSA) adhesive-full glue down method

Specifications are based on averages from manufacturing processes and may vary within normal industry tolerances. Material supply and / or manufacturing processes may necessitate specification changes without notice. Such variations do not affect product performance. This carpet is manufactured and recommended for floor covering use only. As in all quality carpet, colors are subject to dye lot variations. For optimum side match and finished seam appearance, this product should be installed whenever possible, with seams running perpendicular to major external (outside) light sources. The equipment used to manufacture patterned (graphics) carpet may create visible lines in both length and width directions. This characteristic will not always be detectable in small samples and is not considered a manufacturing defect. Chair pads are recommended under office chairs with rollers to preserve appearance retention, avoid premature or accelerated wear, and act as a deterrent toward delamination. Special backing systems are available that do not require chair pads. Walk off mats are recommended at building entry ways to reduce soiling. For Warranties to apply, all adhesives and seam sealers must be approved by Signature.
