

CROSSROADS X NATURE'S FUSION

Connections happen at the crossroads.

In senior living design, connections are everywhere—between residents and caregivers, between public and private space, and between residential warmth and elevated performance. Here, design becomes more than a surface—it becomes a framework for living, working, and healing. These connections foster well-being, support dignity, and bring calm to the spaces people rely on.

Signature Flooring begins at that crossroads—where purpose meets design. Through soft texture, biophilic design and color, and seamless transitions, we create flooring that brings residential comfort with lasting performance. Two of our latest introductions—**Crossroads Collection carpet tile** and **Nature's Fusion Collection Loose Lay LVT**—coordinate soft, woven-inspired texture with organic wood and stone visuals for serene, connected environments.

Because the most meaningful spaces don't just perform—they inspire connection. **Visit us at EFA, Booth 539**
